INTEL LEFT THE NUC BUSINESS AND LICENCED THE PRODUCTS TO ASUS

Through our partnership with ASUS IoT former INTEL NUC products are available at Alcom electronics

Intel has announced that it has granted a non-exclusive licence to ASUS to develop and sell 10th to 13th generation NUC Mini PCs. This means that ASUS will be able to manufacture and sell new models of NUC Mini-PCs, as well as support current models.

NUC Mini-PCs are compact and powerful devices that are ideal for a variety of uses, including work, entertainment and gaming. They are popular with users looking for a small, lightweight computer that they can easily carry with them.

Intels's decision to licence its NUC line of business to ASUS is good news for NUC mini PC users. ASUS is a trusted manufacturer with a long history of developing and selling mini PCs. ASUS is expected to continue to innovate in design and development and deliver products that are even better than current models.
