

CASE STUDY :THE IMPORTANCE OF SAFE AND RELIABLE OPERATION BY COOPERATING WITH A TRUE EMC SPECIALIST

As an innovation and knowledge partner, SCHURTER is closely involved in the development of input systems for machines and devices used all over the world, often under demanding or complex conditions. Operating those devices must be done safely and reliably at all times. After all, a malfunction can have far-reaching consequences.

Alcom electronics, as the SCHURTER representative in the Benelux, helps select the most suitable materials, software and the various components. Development partners can thus rely on making the right choices for a reliable end product and an efficient production process. With very little extra cost, high-quality, user-friendly and EMC-certified input systems can be integrated into your application in a way that fits perfectly with the production process
