

EDGE GO® - THE REMOTE MANAGEMENT SOFTWARE FOR ALL EDGE DEVICES

EdgeGO® is a robust software platform for remote device management in edge computing environments. It prioritizes quick deployment and user-friendly operation while ensuring scalability and security. The platform offers real-time notifications, remote desktop access, and a customizable interface. It also includes exclusive features like Smart Embedded Management Agent (SEMA) and ASD+ SSD lifespan estimation for ADLINK device users. EdgeGO® is an essential solution for companies that require 24/7 global management of their edge devices from any location.

Main Features

- **Device Management Anytime, Anywhere:** Remotely access desktops, reboot, and shut down devices without any location restrictions via EdgeGO's web-based interface
- **Real-Time Notifications:** Stay informed with rule-based alerts sent through preferred platforms such as email, LINE, Teams, and more, ensuring timely responses to any issues
- **Script and Package Deployment:** Execute scripts and deploy packages with just a few clicks, utilizing a repository for convenient monitoring, uploading, and reuse
- **Customizable Visual Dashboard:** Create dynamic dashboards with graphs, statistics, and charts to meet specific operational needs, integrating data from third-party add-ons like Grafana
- **Advanced Edge Security Measures:** Protect user devices with secure connections, two-factor authentication, and a secure device onboarding process. The platform also allows users to lock or unlock USB ports to prevent malware spread

- **Exclusive Features for ADLINK Device Users:** Benefit from embedded functionalities like the Smart Embedded Management Agent (SEMA) for local hardware data collection and ASD+ SSD lifespan estimation based on user work cycles
