

SIMPLIFY SYSTEM CONSOLIDATION BY INTEGRATING THE HYPERVISOR ON X86 COMPUTER-ON-MODULES

The Hypervisor is available as an easy addition to congatec's x86-based Computers-on-Modules (COMs). Now the Hypervisor will be implemented in firmware and will be standard on all congatec x86 COMs, automatically lowering the barrier to start working on system consolidation. By simplifying real-time virtualization for system consolidation, congatec is making it easy to save costs; reduce system count; and reduce size, weight, and power consumption (SWaP).
